

Registration for a Private Center

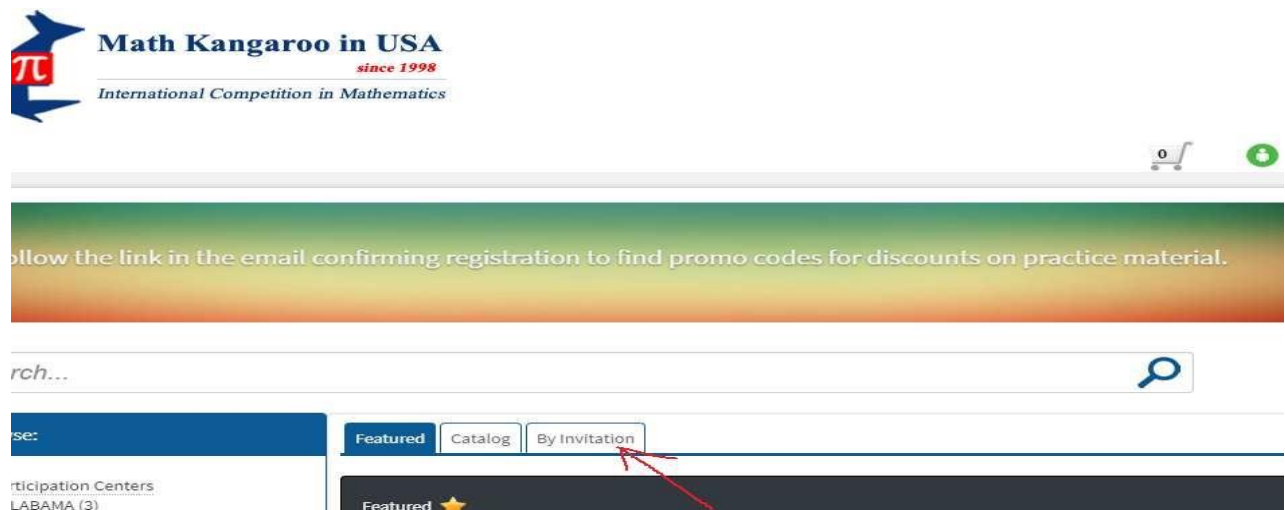

Some centers chose to have a Private enrollment which means the courses are not visible on the catalog and are dedicated only for the students who attend the school or the math club at such MK locations

The private center **Invitation Code** is required to register for the private center. **The code could be obtained only from the manager of the center, we don't share this information.**

To access and register for the Private course you need to be logged in or to create your account here:

<https://mathkangaroo.oasis-lms.com>

Once you logged in, select the By Invitation tab on the main screen and enter the Invitation Code.

Your desired MK location will be displayed on the next window and you will be able to proceed with your child enrollment.

Feel free to contact us at info@mathkangaroo.org with any question.
