MATH KANGAROO PRESS RELEASE

Successful Math Kangaroo Workshop Draws Educators from Across North America

In a collaborative effort to enhance math education, in December 2023, Math Kangaroo hosted a successful workshop, "Transforming Math Competition Problems in K-8 Education," drawing the participation of approximately 60 educators from the United States and Canada.

Workshop Highlights:

- **Exploring Innovative Teaching Approaches:** Educators delved into innovative strategies for transforming math competition problems, with a focus on emphasizing processes over rigid procedures.
- **International Participation:** The workshop facilitated collaboration among educators from diverse regions, fostering a cross-border exchange of ideas and best practices.
- **Expert-led Sessions:** Renowned experts, including Prof. Pelczer from Canadian Math Kangaroo, led engaging sessions, providing practical insights into incorporating competition math problems into teaching methods.

Shared Resources:

To further support educators, Math Kangaroo is sharing **recorded sessions**, **presentations**, and certificates, ensuring that valuable insights are accessible to all participants.

Quotes:

"We appreciate the active participation from educators across North America, showcasing their dedication to advancing math education." - Joanna Matthiesen, CEO
