

MEHTA<sup>+</sup>

## MehtA+ Introduction to Ethical Hacking Camp Grades 7-12

**Registration Link:** <https://mehtaplus.com/courses/intro-to-ethical-hacking/>

**Promo Video:** <https://www.youtube.com/watch?v=9uToHuPEF3Y>

**Promo Code:** MA67H9 (20% off \$50 camp)

**Questions:** Email [info@mehtaplustutoring.com](mailto:info@mehtaplustutoring.com)

**What:** In this 1 week hands-on self-paced course, MIT engineers will teach Grades 7-12 students the basics of penetration testing (ethical hacking), networking, security and cybersecurity best practices.

Students will learn how to ethically hack using Browser Exploitation Framework (BeEF) on Kali Linux to evaluate system security. They will specifically learn the various ways in which malicious actors steal credentials and data, and how to protect oneself against it.

Students will complete fourteen labs and write a penetration test report for their final project. Upon completion, students will receive a certificate.
