LEVELS 5 AND 6**SAMPLE QUESTION FOR 3 POINTS**

Where is the kangaroo?

- A) In the circle and in the triangle, but not in the square.
- B) In the circle and in the square, but not in the triangle.
- C) In the triangle and in the square, but not in the circle.
- D) In the circle, but not in the square and not in the triangle.
- E) In the square, but not in the circle and not in the triangle.

SAMPLE QUESTION FOR 4 POINTS

A certain dance group started out with 39 boys and 23 girls. Every week, 6 more boys and 8 more girls joined the dance group. After a few weeks, the number of boys and the number girls in the dance group was equal. How many participants were in the dance group at that time?

- A) 144
- B) 154
- C) 164
- D) 174
- E) 184

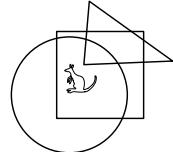

SAMPLE QUESTION FOR 5 POINTS

Jane multiplied the product of 18 factors, each equal to 8, by the product of 50 factors, each equal to 5. How many digits does her final product have?

- A) 13
- B) 40
- C) 52
- D) 60
- E) 100

LEVELS 5 AND 6 ANSWERS**SAMPLE QUESTION FOR 3 POINTS**

Where is the kangaroo?

- A) In the circle and in the triangle, but not in the square.
- B) In the circle and in the square, but not in the triangle.**
- C) In the triangle and in the square, but not in the circle.
- D) In the circle, but not in the square and not in the triangle.
- E) In the square, but not in the circle and not in the triangle.

LEVELS 9 AND 10**SAMPLE QUESTION FOR 3 POINTS**

Which of these is a multiple of 3?

- A) 2009 B) $2 + 0 + 0 + 9$ C) $(2 + 0) \cdot (0 + 9)$ D) 2^9 E) $200 - 9$

SAMPLE QUESTION FOR 4 POINTS

Borromean rings have the property that they cannot be separated without cutting, but when any one ring is removed the remaining two are no longer linked. Which figure represents the Borromean rings?

**SAMPLE QUESTION FOR 5 POINTS**

A student who had 2009 cubic blocks of side length 1 and 2009 square colored stickers of side length 1 built a rectangular prism and completely covered the surface with the stickers making sure that none of them overlapped. It turned out that some stickers were not used. How many stickers were left over?

- A) more than 1000
B) 763
C) 476
D) 49
E) This situation is impossible.

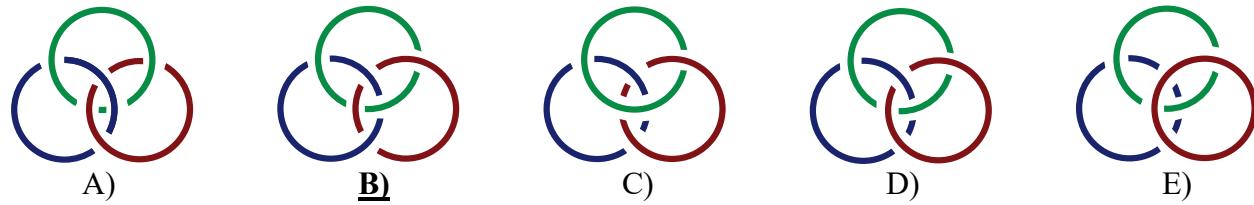

LEVELS 9 AND 10 ANSWERS**SAMPLE QUESTION FOR 3 POINTS**

Which of these is a multiple of 3?

- A) 2009 B) $2 + 0 + 0 + 9$ C) $(2 + 0) \times (0 + 9)$ D) 2^9 E) $200 - 9$

LEVELS 11 AND 12**SAMPLE QUESTION FOR 3 POINTS**

For how many positive integers n is the number $n^2 + n$ prime?

- A) 0 B) 1 C) 2 D) more than 2, but finitely many E) infinitely many

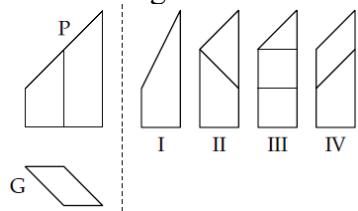

SAMPLE QUESTION FOR 4 POINTS

2009 kangaroos, each either of a pale or a dark hue, compared their height. Only one pale kangaroo was taller than exactly 8 dark kangaroos, only one pale kangaroo was taller than exactly 9 dark kangaroos, only one pale kangaroo was taller than exactly 10 dark kangaroos, and so forth. Finally, only one pale kangaroo was taller than all the dark kangaroos. How many pale kangaroos were there?

- A) 1000 B) 1001 C) 1002 D) 1003 E) This scenario is impossible.

SAMPLE QUESTION FOR 5 POINTS

On the left side of the dashed line are shown the view of a certain building from the south (P) and the top view of this building (G). Which of the figures labeled I, II, III, and IV is the view of this building from the west?

- A) Figure I B) Figure II C) Figure III D) Figure IV E) None of these.

LEVELS 11 AND 12 ANSWERS**SAMPLE QUESTION FOR 3 POINTS**

For how many positive integers n is the number $n^2 + n$ prime?

- A) 0 **B) 1** C) 2 D) more than 2, but finitely many E) infinitely many
